

Tired of Seizures? Take Control!

Seizure Tracker™ can help!

Time and video-capture seizures as they happen on iPhone or Android. The Seizure Tracker system is revolutionizing the way seizure data is collected. The mobile apps are the first and only real-time mobile seizure recorder you can carry in your pocket. With the press of a button you can time and video record a seizure as it happens then add detailed textual diary information that can be edited at any time. You can also record when a rescue medication or VNS magnet is used during a seizure.

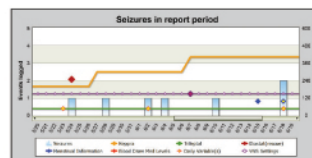

Easily connect your mobile app to SeizureTracker.com to create extensive reports and share them with your doctor. **Ooops...lost your phone?** No biggy. Once your data is synced to the cloud it is always recoverable from the website.

Be Aware!
The Seizure Tracker website, mobile apps and voice control tools can empower you to play an active role in your own healthcare and treatment decisions.

Track It!
Collecting accurate seizure data and using the extensive graphs available through the Seizure Tracker reporting system will help you and your doctor better understand and control your seizures.

Share It!
Share access to your Seizure Tracker account with your doctors, schools and other care providers. Your care providers can easily access your data and run reports through the Seizure Tracker "Valet" system or your electronic health record system (Epic or Cerner). Just share access through your Seizure Tracker account.

LET'S GET STARTED!

- 1 Download** the Seizure Tracker app to your iPhone or Android device and start tracking today!
- 2 Visit** the Seizure Tracker website to set up an account and start creating detailed reports.
- 3 Share** your Seizure Tracker account information with your care providers.

Created by Patients for Patients!

Easy to use! • Free for Patients and Families! • Enhances Communication! • Improves Results!

seizuretracker.com

Seizure Tracker was created by parents struggling to share accurate information about their son's seizure activity with his doctors. Launched in 2007, it has grown into the largest and most comprehensive seizure diary in the world.
